ELA TRAINING SERVICES

Specialists in Project Management, Leadership and Management, and Business Improvement

3-Day Agile Project Management

Agile project management is an iterative approach to delivering a project throughout its life cycle. This course covers 3 popular methodologies: Agile DSDM, Scrum and Lean Six Sigma.

At ELA, we combine a wealth of industry experience with a passion for learning, and a 10-year track record of delivering publicly and privately funded training. We have developed a package of apprenticeships and short courses to address a wide variety of training needs for your employees.

Our team has accumulated decades of experience in delivering Project Management courses. The majority of courses available commercially are renowned for being too intense; delivered as 'exam factories' with little genuine concern for learning.

At ELA, we think differently by focusing on what's important to you!

The models we have developed for our courses have been structured uniquely to provide a better learning experience to other course providers, combining quality coaching with real 'life at work' experiences. At the centre of our programme design and delivery is our passion for quality training and in-depth, thoroughly embedded learning. We get excellent feedback from our clients.
