

PRINCE2[®] Foundation and Practitioner

Specialists in Project Management, Leadership
and Management, and Business Improvement

 www.ela-training.co.uk

PRINCE2® embodies established and proven best practice in project management. It enables project managers to effectively control the use of resources, and manage business and project risk more effectively.

At ELA, we combine a wealth of industry experience with a passion for learning, and a 10-year track record of delivering publicly and privately funded training. We have developed a package of apprenticeships and short-courses to address a wide variety of training needs for you.

Our team has accumulated decades of experience in delivering Project Management courses. The majority of courses available commercially are renowned for being too intense, delivered as 'exam factories' with little genuine concern for learning.

At ELA, we think differently!

The models we have developed for short courses have been structured differently to other course providers, and we get excellent feedback from our clients.

Benefits of ELA's Approach

01 ELA's unique 2-week model is less intense and allows for a better learner experience

Other providers usually deliver 3 and a half days' training, but ELA delivers 5 full days of training **02**

03 Blended approach: classroom and virtually delivered solutions

Splitting PRINCE2[®] Foundation and Practitioner, providing improved focus and chance of success **04**

05 Flexible use of online exam vouchers, so exams can be taken at any time

Reduced price for ELA APM L4 Apprentices **06**

Day

1
